EXPERIENCE

FRONTEND DEVELOPER (REACT) - External Engineer

[Osapiens](#) (via [ZEST LABS](#))

Jul 2023 – Present

Mannheim, Germany (Remote from Sofia, Bulgaria)

- Contributed as an external frontend engineer across multiple enterprise SaaS projects, delivering reusable and scalable React solutions at osapiens (osapiens.com).
- Designed, refactored, and maintained modular frontend architectures using React and TypeScript to support evolving business requirements.
- Collaborated closely with cross-functional teams (frontend, backend, QA, product) across different projects to deliver high-quality features.
- Built dynamic and responsive user interfaces using MUI, React Query, Zustand, React Hook Form, and Vest.
- Implemented performance optimizations and frontend best practices to improve load times, responsiveness, and long-term maintainability.
- Developed complex UI workflows, including node-based visualizations for event flows, dependencies, and process logic using React Flow.
- Applied test-driven development (TDD) principles and increased test coverage across projects using Vitest, Jest and Playwright.
- Maintained high code quality standards through TypeScript, ESLint, and regular code reviews.
- Worked closely with QA teams to identify, debug, and resolve issues across multiple codebases and release cycles.

REACT DEVELOPER

PORTAGE STAFFING SOLUTIONS

Jun 2021– Jul 2023

Indianapolis, USA (Remote from Sofia, Bulgaria)

- Designed and maintained scalable, reusable frontend components using React and TypeScript across multiple application areas.
- Implemented robust form handling and validation using React Hook Form and Yup to support complex user workflows.
- Improved state consistency and responsiveness through structured Redux-based state management.
- Built responsive and visually consistent user interfaces with Material-UI, aligning implementations with modern UX and design standards.
